

CASE: MyBuilder

Area: London, UK **Products used:** Acoustic Tiles

Architect: Inhouse

When MyBuilder redesigned their offices in Clerkenwell, London, they wanted the space to reflect their business values. As a company matching tradesmen with building projects all over the UK, their new offices had to have a high-class look and capture their modern entrepreneurial spirit.

The solution was to create modular dividers throughout their office to create soundproof workspaces and practical shelving. The result is a well-designed acoustic workspace that's very comfortable for employees to work in.

Products used:

Acoustic wood-wool Tiles — Triangle, Square, Parallelogram.
