

# CASE: Nostrana Portland

**Area:** Portland, US **Products used:** Acoustic Panels

**Interior architect:** Rick Postestio

Nostrana is an Italian bistro located in Portland, Oregon, famous for its Neapolitan pizzas and a vast selection of fine wines. Combining traditional cuisine with a charming atmosphere, Nostrana is now an institution for hungry Portlanders.

Nostrana believes in using locally sourced ingredients, so they wanted to use environmentally friendly building materials that reflect their brand vision. Leading architect, Rick Potestio, suggested using wood wool panels to create a comfortable acoustic dining environment. BAUX wood wool panels were used as a cladding for the first floor as well as the upstairs dining section. Combined with cork stools and a giant glass wine cellar with chrome details, the wood wool panels add a subtle textural variation that fits well with the Nostrana concept.
