

CASE: SANDS

Area: Oslo, Norway
Architect: Scenario

Products used: Acoustic Panels
Interior Architect: Trine V. Roald and Nichlas Hvesser

SANDS are one of Norway's biggest law firms, with over 140 lawyers working from five locations in Norway. Scenario Interior Architects was commissioned to renovate their Oslo office in the downtown Vika district, where a derelict art institute was being joined with an adjacent building to create one central office space. SANDS wanted to create a relaxed, welcoming space.

The design team used BAUX own toolkit with 3D CAD files to create designs for five walls on seven floors, all of them in exquisite black wood wool, offering a subtle contrast to smooth wood and glass office surfaces. Each panel is a unique mix of BAUX panel shapes, randomly created from a wide range of tiles to communicate creativity. Together the panels have created the biggest BAUX wall in Norway!

Products used:

Acoustic wood-wool Panels — Diagonal, Stripes, Lines, Quilted, Check.
