

CASE: Vega Salmon

Area: Kolding, Denmark **Products used:** Acoustic Panels, Acoustic Plank

Interior Architect: Bettina Therese

In 2016, Vega Salmon decided to move their head office closer to their production centre in Handewitt, Flensburg. They seized the opportunity to create a modern, functional office space, with flexible working solutions for all divisions in the company. They settled on an open office solution, with BAUX Panel and Plank designs creating the best possible acoustic environment.

Principal architect, Bettina Therese, designed the interior space to reflect Vega Salmon's business values - colour, material selection, employee placement, decoration and furniture were all part of her vision. Vega Salmon wanted silence to be a part of their new office design – a reflection on the stillness found around the fjords that are the salmon's natural habitat. The concept was to bring the interior closer to nature.

Products used:

Acoustic wood-wool Panels — Quilted.

Acoustic wood-wool Tiles — Plank.
