

CASE: Vitos Restaurant

Area: Oslo, Norway **Products used:** Acoustic Tiles

Architect: Frost **Interior Architect:** Inger Svare Morset

The town of Vollen has historical ties to boats and horticulture. Frost Architects were tasked with creating an attractive modern restaurant for guests and local residents in Vollen's beautiful marina. But the large glass windows overlooking a fjord presented designers with acoustical challenges.

BAUX wall elements have created distinctive decorative features and a better acoustic environment. The BAUX designs give the restaurant a unique visual signature, which together with other furnishings feels modern. Panels with blue and black tones create a visible connection to the sea view outside.

Products used:

Acoustic wood-wool Tiles — Triangle, Parallelogram
